

TRIPLE LIP SEAL

For Universal U2 Series & U2 ND Series Pumps

Features and Benefits

- Long life – Made from a proprietary PTFE, these lip seals offer increased hardness for wear resistance and strength to retain shape, resulting in extended seal life. Can run dry for short amounts of time.
- Robust design / chemical resistance – Only one wetted Viton® o-ring, these seals exhibit excellent chemical resistance whose function is to eliminate any shaft deflection enhancing the seal's life. The absence of moving o-rings eliminates the risk of o-ring hang-up or clogging.
- Suited for sticky or viscous substances – Can also handle thin fluids under low pressures.
- Easy to maintain - The self-aligning design simplifies installation and ensures proper alignment during operation.
- Versatile - Rated up to 200 psi (13.8 bar).

Applications

- Industrial - Fracking chemicals, glue, paint, chemicals, cosmetics
- Sanitary* - Food waste, chemical fluid transfer
- Personal Care - Lotions, soaps, creams

* The triple lip seal is not produced with FDA complaint materials, however may be used in waste streams, chemical fluid transfer, or other areas where FDA compliant materials are not required.
